Comments:

The MASC Permit only covers the quality assurance for the manufacture and repair of certified equipment to the issued certification / certification drawings / ARP 0108 principles and does not imply a statement by MASC of compliance of the equipment to the standards. The original certificate issued for the equipment covers compliance of the equipment to the applicable standards.

Auditing is of a sampling nature and as such MASC cannot cover all aspects of the quality system. It is incumbent on the organization to ensure that they meet the requirements of the Quality System and the Quality requirements of the reference documents, including:

Manufacture

- SANS 10242-1: The rewinding and refurbishing of rotating electrical machines Part 1 – Low-voltage three-phase induction motors.

Repairs

- OD314-5: QUALITY MANAGEMENT SYSTEM REQUIREMENTS AND ASSESSMENT of, for IECEx Service Facilities Involved in repair, overhaul and modification of Ex equipment
- OD315-5: Additional Requirements for IECEx Service Facilities Involved in repair, overhaul and modification of Ex equipment.
- SANS 60079-19: Electrical apparatus for explosive gas atmospheres. Part 19: "Equipment repair, overhaul and reclamation.

General

The mark holder shall:

- have a minimum of two MASC trained specialists on every technique as stated in their mark permit
- only use the MASC permit logo as per MASC rules
- only display it on equipment covered in this Product List. The Mark holder can request a copy of document number MSFO Issue, maintenance, Suspension and Withdrawal of Mark Permit for more information.

By the extension of the certificate listing on the Mark Scheme product list MASC is not condoning the use of expired certificates, but only covering the quality system for when the product is re-certified. Certificate marked with an asterisk (*) needs to be re-certified as per written arrangement with MASC test lab.
